FAX: (406) 522-0018

EPICENTER THERAPY SERVICES HANDWRITING GROUP

The purpose of this group is to make handwriting available to children ages 4-10 as an automatic and natural skill. There will be one therapist for a group of up to three children. The group will meet twice a week for four weeks.

There will be two sections: a Writing Readiness Group and a Printing Skills Group.

Writing Readiness will cover Pre-K and Kindergarten skills and will focus on recognition and writing of the alphabet. Children will be able to write their names independently and demonstrate improved pencil grasp.

Printing Skills will focus on developing automatic motor memory for letter formation and will focus on writing simple sentences, fluency and smooth motor movement.

A vertical style of writing will be explored with individual recommendations being made. A D'Nealian style writing will also be supported.

STAFF:

Erin Smith, OTR/L, is an occupational therapist who has experience with school-based therapy and will be running the group.

Holly Kassner, COTA/L, is an occupational therapy assistant who works with all aged children and will be assisting the group.

Children who write well do
better in school, have a positive
self-esteem and enjoy their
classes more!!!
